TERMS OF BUSINESS

All prices in the price list are in EUR excluding VAT.

Terms of payment;

30 days net unless otherwise agreed and after customary credit check. For orders over 44 000 EUR an advance payment of 50% of the total order value will be issued.

TERMS OF DELIVERY:

Ex works.

Any shipping pallets will be invoiced separately.

Visible freight damage must be reported directly to the driver. Hidden freight damage must be reported within 7 days.

Delivery time is calculated from the date the purchaser has sent the order in writing to order@lundbergs-mobler.se with complete order information, followed by a sent order acknowledgment (OA).

CHANGES

Possible to make changes to the order within 1 week after OA. Changes must be in writing. After this period, an administrative fee of 65 EUR and additional costs for changes apply.

TERMS OF WARRANTY:

60 months from the delivery date for construction and production defects.

Reconditioned products come with a 24-month warranty. The warranty does not cover normal wear and tear or deterioration due to improper use of the product.

10 years spare parts guarantee. Applies to the spare parts described in the price list and from the year the product was discontinued.

STORAGE:

If a delivery is postponed for longer than 14 days, warehouse rent of 33 EUR pallet /new month will be issued. If an order is moved forward more than 30 days, in addition to the above warehouse rent, this order will also be invoiced in accordance with the initially desired delivery time.

RECONDITIONING:

The quoted price is a good estimate that we strive not to exceed.

It includes reconditioning of the entire table based on its conditions. The price can also vary greatly depending on the volume of tables and chairs that need reconditioning.

Let us tell you more about our reconditioning service, get in touch with us at

rekond@lundbergs-mobler.se

The price does not include round-trip shipping.

THE BEST AT TABLES

For 75 years, our factory has been located in the Southwest of Sweden, more specifically in the town of Tibro, also known as Sweden's furniture centre. Over time, our long history of furniture manufacture has boiled down to a few principles, that today work as our guiding stars in the manufacture and development of new table solutions.

We use raw materials that are sustainable over time, with focus on FSC-labeled wood.

We use clean materials that can easily be separated to make it easier to replace individual parts and thus give the furniture a longer life along with a circular future.

We use materials such as plywood and thick veneer which makes it possible for us to take the furniture back for reconditioning and contribute to future circular furniture flows.

We strive to, in collaboration with designers, develop furniture that stands the test of time, both to the eye and to wear and tear.

Humbly, we would like to say that we strive to be the very best at doing our thing – tables.

YOUR IDEA - NOT OURS

Our table collection consists of 16 models that can be customized with different colours, materials and sizes. This means that it is possible to create over 3,000 design variations from our table collection, giving you the freedom to create a unique table for your project. It also means that both you and we help to produce furniture that stands the test of time, both to the eye and in its intended environment.

OUR ENVIRONMENTAL WORK

That the environment cannot wait for us to take action for improvement is something we can all agree on, but what should we do? It's easy to feel helpless in the face of something as vast and overwhelming as climate change. We have chosen to do what we believe we can do at present, continually educate ourselves, and consistently raise our ambitions to do more, both now and in the future. At Lundbergs Möbler, we welcome change that leads to improvement. Therefore, in our environmental efforts, we base our work on the UN's Agenda 2030, aiming to achieve the 1.5-degree goal by 2030. To succeed in that, we must work purposefully and measurably. We have to acknowledge that it is a process that evolves over time and be flexible. In 2024, this effort will intensify by creating Environmental Product Declarations (EPDs) for our tables.

MÖBELFAKTA

Möbelfakta is a sustainability label for furniture which requires that we furniture manufacturers live up to three requirements; quality, environment and social responsibility. This means to, through the different supplier levels, ensure good craftsmanship, good environmental management and good working conditions.

The criteria are also designed according to the ISO standard 14024 and meet the requirements set by the Procurement Authority, Sweden's municipalities and regions.

Our production meets Möbelfakta's requirements, and our goal is for all our tables to be declared with Möbelfakta. Something that we focus on in our product development when we work on both existing and new pieces in our collection.

SUSTAINABLE PRODUCTS

Sustainable products:

-  Environmentally labeled product – A product with a type 1 environmental label according to ISO 14024 with Svanen, Möbelfakta, EU Ecolabel, or other equivalent label is displayed with the environmental label's logo or green symbol.
-  Sustainability-labeled product or component – A product where the entire or parts of the composite item have a sustainability label, such as FSC, EU Ecolabel, or OEKO-TEX®, is displayed with the logo and/or green symbol of the label.
-  Product containing recycled or renewable materials, according to the definitions in ISO 14021 – Displayed with a purple symbol. Information about the proportion of recycled and/or renewable materials can be provided upon request.
-  Disassemblable product – i.e., a product that can be disassembled into various components and parts that primarily enable reuse and secondarily material recycling when the product reaches the end of its full lifespan is displayed with a blue symbol.

ROOM DIVIDERS

ROOM DIVIDER BELLA HEIGHT 1000/1700 MM

| PRODUCT | DOWEL 1000 MM | DOWEL 1700 MM | SOUND SHEET | PLANTER | INNER PLANTER BOX | MAGAZINE SHELF | MOUNTING FITTING |
|-------------|---|---|--|---|--|---|-------------------|
| Price €/pcs | 116 Ash, incl. white base. (Oak: on request) | 124 Ash, incl. white base. (Ek, enligt offert) | 76 Grey felt. Mounting strap white. Requires 2 pair mounting fitting | 169 White. Requires 1 mounting fitting Internal measurements L315 x W137 x H116 mm | 24 White. Requires 1 mounting fitting | 134 Ash. (Oak: quote) Requires 2 pair mounting fitting measurements H420 x W400 mm | 73/pair White. |

QUOTE GUIDE Create your own combination:

1. How many dowels?

Start by choosing the number of dowels and their height.
(One combination requires at least 4 dowels.) – Draw these up on a piece of paper.
Between each dowel, it is 400 mm.

2. How many mounting fittings? Dowel + dowel = at least 2 mounting fittings – Draw the mounting fittings between your dowels. (Mounting fittings may be added in step 3.)

3. Which accessory? Start from the mounting fittings you have drawn up and place the accessories, according to you wishes. Take into account:

Planter – requires 1 mounting fitting. Cannot be placed on the same mounting fitting as Magazine shelf. Magazine shelf – requires 2 mounting fittings. Lower mounting fittings can be combined with another magazine shelf or with sound absorbing panel. Sound absorbing panel – requires 2 mounting fittings and can also be used as mounting fittings for another sound absorbing panel or planter and the lower part of a magazine shelf.

4. Count the mounting fittings.

5. Feel free to enclose a simple sketch when requesting a quote to check the correct number of mounting fittings.

For ready-made combinations see next page.

WOODEN CABLE DUCT

All cable ducts are manufactured from wood, to the greatest extent possible using raw material (waste). This results in lower CO2 emissions compared to a metal cable duct. The cable duct is available in two sizes, large intended for electrical lists and small for two powerdots. Wooden cable ducts can be customized in color according to customer preferences. The standard placement for cutouts are centered in the tabletop or table half.

SUSTAINABLE COLORS

The color is the first thing you perceive. That's why we believe it's important to combine the function and form of our furniture with colors that stand the test of time. As inspiration for our curated color palette, we have chosen to draw inspiration from something enduring - nature, but also our tradition.

Based on nature's color scale, the colors in our palette have been adapted for indoor use. The selected colors fit well in many contexts and also complement many other colors. We call them 'bridge colors' because they are suitable as transitions between the other colors you plan to use. We want to provide you with ample opportunities but also a starting point. So that you can find both products and colors that suit your project and endure over time.

Nature's colors never go out of style. They are colors we grew up with and perceive as natural and beautiful. Nature's colors are timeless and appeal to many, regardless of taste.

Brightness contrasts and richness of hues. Nature is anything but neutral or colorless. In nature, there is a rich diversity of hues with contrasts in both brightness and color intensity. We have emulated this in our color and material palette. You can enhance it further with the additional colors you choose to add.

The small details are the most vibrant. In nature, we find the most vibrant colors in the small details. For the metallic details, we have therefore chosen to add a larger number of colors, many of which are vibrant. Like a colorful flower among all the green. Or a upholstered seat on your chair.

Nature's color palette makes us feel good. Research clearly shows that nature is a place that provides both recovery and well-being. We never tire of the colors of nature. Allowing nature's colors to inspire color choices and combinations is sustainable for both people and the environment.

FOG (S 4000-N) neutral

Fog is a neutral gray tone inspired by days when the world blurs into indistinct outlines. It imparts a sense of calm. This color simply "is," not making a bold statement on its own. Fog is a middle-tone gray that pairs well with both lighter and darker hues, helping to unify the color palette. Similar to how the color of mist appears to change, neutral gray tones exhibit a subtle variability. To mitigate this variability while creating brightness contrast with natural wood, we've chosen a middle-tone as our lightest gray shade. Fog particularly complements cool colors and works well in combination with darker tones, such as Sky and Sea in our color palette. This neutral gray tone combines harmoniously with wooden elements to introduce a touch of warmth.

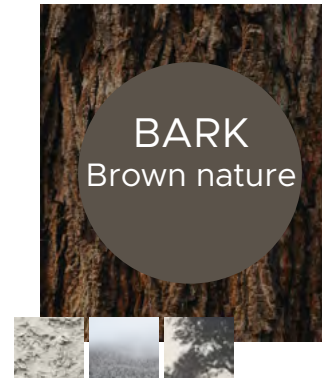

SHADOW (S 7000-N) neutral

Shadow is a darker, neutral gray tone inspired by sunny days when we seek places that offer a moment of rest. Or days when the sun's rays find their way through the window, and shadows dance on the wall. In combination with our hue Fog, black, and white, Shadow softens contrasts and adds variation to the overall palette, much like the shadow with its blurred edges visible on the wall. Shadow pairs beautifully with several of the darker hues in our color palette. Neutral gray tones are not found in nature as a distinct color but only as perceived colors. However, they are commonly used indoors. To mimic the brightness contrasts found in nature, we have incorporated several different neutral gray tones on painted surfaces and materials.

CLAY (S 4005-Y20R) warm neutral

Clay is a subdued gray-brown shade with warm undertones. The inspiration for this hue is drawn from earth, stone, and sand, as well as traditional color pigments like Yellow Ochre and Iron Oxide Yellow. Clay can be described as a warm neutral with its reddish-yellow hints and a low level of chromatic intensity. Clay allows other colors to shine. When paired with more vibrant hues, Clay serves as an excellent foundational color. We've chosen a slightly darker tone to enhance stability and reduce sensitivity to shifting light conditions. This darker tone also creates luminance contrast with wood. Clay pairs exceptionally well with yellow-red tones. In our color palette, shades like Barn and Tradition complement Clay beautifully. Yellow ochre tones also create a stunning combination with this warm neutral.

BARK (S 7005-Y20R) warm neutral

Bark is a dark and muted gray-brown shade with a warm undertone. This hue draws inspiration from the earth, the bark on a tree, and twigs on the ground. Bark is a warm neutral with reddish-yellow undertones and a low level of chromatic intensity, much like Clay. Combining Clay and Bark with wood creates luminance contrast. If you desire a color that creates a smooth transition to natural materials like wood, as well as warmer tones, Bark and Clay are excellent choices. These two hues add warmth to the overall palette, in contrast to the combination of Fog and Shadow, which imparts a cooler feel. Bark brings a sense of calm and stability, along with a touch of exclusivity.

TRADITION (S 7010-Y90R)

Tradition is a dark red hue that brings warmth. The inspiration for this color comes from traditional pigments such as English Red and Oxide Red. To harmonize with the many colors found in nature, we've chosen a red with a touch of yellow, as the natural color palette tends to be warm-toned. Due to its dark and muted nature, this color can be applied to larger surfaces without being overpowering. Similar to our dark hues Bark, Sky, Sea, and Forest, Tradition can contribute to an exclusive ambiance. When combined with muted rose tones, Tradition introduces dynamics and variation to the color palette. Incorporating hints of purple tones alongside Tradition adds an unexpected touch. Tradition proves to be more versatile than initially thought, pairing well with most colors featuring yellow or red undertones, especially when they differ in darkness.

BARN (S 5030-Y80R)

Barn is a distinct red hue with a significant yellow undertone, adding warmth. Drawing inspiration from both brick and our commonly found red-colored buildings, we've developed the color Barn. This hue is classic yet introduces something unexpected to the color palette. Barn pairs well with warm neutrals, ranging from very light to almost dark, almost brown-black shades. It complements natural materials and burnt tones. With its warmth and vibrancy, Barn demands attention. It is the most vibrant hue in the palette and works exceptionally well on our chairs and stools. When combined with Tradition, a variation is created that tones down the intensity of Barn.

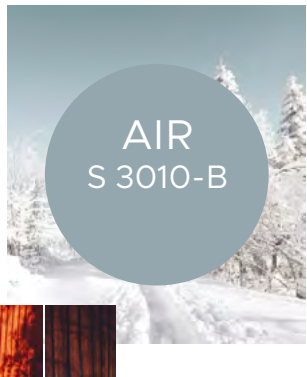

SEA (S 7010-B30G)

Sea is a bluish hue with a distinct leaning towards green. Inspired by the colors of the sea where light causes the water to shift in tones, from blue to teal. It is dark and muted, adding a cool feel to the overall palette, much like Sky and Air, our other two hues with blue undertones. Sea pairs well with other teal tones but also complements bluer hues with a hint of red. It is a color that can be perceived as both modern and classic, depending on the context. Sea brings an elegant and serene feel when combined with the dark tones in our color palette. When Sea is paired with warm reddish-yellow tones and wood, it creates significant contrast, enhancing each other.

SKY (S 7010-R90B)

Sky is a dark blue, muted shade with a subtle hint of red. Inspired by the way a dark gray-blue sky appears from a distance, this hue captures the essence of the changing colors in the sky. While skies may vary in color, we generally associate them with various shades of blue. This classic blue tone is commonly used in interior design and complements both gray and beige tones. It serves as an excellent foundational color for those who prefer darker tones, creating a subdued base. Sky brings a sense of tranquility, staying in the background while inviting focus. It can also contribute to an exclusive ambiance. Blue tones offer versatile possibilities. Combining Sky with Tradition evokes a classic feel. For added color dynamics, consider incorporating Air and Barn into the palette. Pairing Sky with Forest creates a calmer atmosphere.

AIR (S 3010-B)

Air is a light, gray-blue tone with a crispness to it, drawing inspiration from a cold winter day when the sky is clear, and the air feels fresh. It contrasts with many other colors in the palette, not only due to its hue but also as the lightest shade in the color palette. Air is impactful when paired with warm tones like Barn and Tradition. When combined with warmer tones or blue hues with hints of red, Air may exhibit a subtle touch of green. Conversely, when paired with teal or green tones, it appears bluer. Air unexpectedly complements many colors and materials in the palette. When combined with white tones and light hues, Air creates a fresh, modern, and almost playful ambiance.

FIR (S 5020-G30Y)

Fir is a distinctly green hue inspired by the color of pine needles, moss, and grass. It carries a green with hints of yellow, mirroring the natural greens found in the environment, all of which tend to have yellow undertones. This classic green shade draws inspiration from traditional pigments like Zinc Green and Chrome Oxide Green. Nature is abundant with green tones, and Fir harmonizes well with many other yellowish-green shades. It also complements green tones with a hint of blue if you aim to introduce cooler hues to the color palette. Fir pairs well with yellow and orange tones, as well as wood for added warmth. When combined with its complementary color, red, the green is enhanced. Think about the combination of green foliage and red berries. Similar to Air, this versatile hue complements both warm and cool colors. Fir is particularly well-suited for our chairs and stools.

FOREST (S 7010-G30Y)

Forest is a dark green and muted hue with hints of yellow, selected with inspiration from how we perceive the color of the forest when observing it from a distance. It captures the moment when the green tone appears darker than it actually is, and the subtle color variations blend together. This creates a tranquil feeling, much like our Forest shade. Fir and Forest complement each other well, and combining them with additional green tones can replicate the palette found in nature. When paired with neutrals like Clay and Bark, a serene atmosphere is achieved. Forest blends harmoniously with many other colors, and when combined with warm rose tones, it adds energy. With Forest, you have ample opportunities to be creative and choose a hue that complements the colors you are working with.
